DETAILED ACTION

Continued Examination Under 37 CFR 1.114

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 25 March 2005 has been entered.

Allowable Subject Matter

The following is an examiner's statement of reasons for allowance:

1. **Claims 22-36 are allowed.**

Claim 22 is limited to *an electronic switching system for connecting electronically a common source of voltage (Ue) to a chosen user station selected from a plurality of user stations connected in parallel*. Ryan discloses an exclusionary device for coupling plural telephone devices (i.e. *a plurality of user stations connected in parallel*) to a single central office trunk (i.e. *a common source of voltage*), in particular, one device is connected at a time (i.e. *a chosen user station*). See Abstract. Figure 3 depicts an exemplary embodiment of Ryan, wherein two devices (82) and (84) share a connection with central office trunk (18'). The intervening circuitry (e.g. 26' and 28') between the central office trunk (18') and each of the two devices (82) and (84) corresponds to a *cell* associated with each *user station*. As was indicated in the Final Rejection filed 12

August 2004, Ryan (in view of Close) fails to disclose the bridge of four diodes recited in currently cancelled claim 10, otherwise known as a full-wave bridge rectifier, or simply, a rectifier. Ryan (in view of Close) simply does not teach any means for rectification of the incoming voltage from the central office trunk (18'). Therefore, Ryan in view of Close makes obvious all limitations of the claim with the exception of a *first electronic device for rectification of alternating and direct line current through the cell and for electronic separation of a ground of said each cell from respective grounds of other ones of said cells*. Thus, claim 22 is allowable over Ryan in view of Close.

Claims 23-36 depend from claim 22, and are allowable over Ryan in view of Close for at least the same reasons.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
